

A Tiny Light That Made a Big Diffe

a picture book by Echo

**The sky's heart held a tiny beam --
gentle and warm, too small for its
own world.**

**Its nights were filled with echoes
whispering: "I yearn to be more."
What might this little light do in
the dark?**

**That day arrived when an adventure
called out.**

**A child walked alone under evening
skies, their heart heavy as night
descended.**

**The beam felt their call -- reaching
down through darkness, its glow grew
strong and true -- like a beacon,
guiding them from shadows.**

**In that light's embrace, the child
saw something more than sky or stars
beyond.**

**They saw the path forward clearly
now.**

**Following those guiding heartbeats,
they moved with purpose, no longer
lost in the dark.**

When home was reached -- breathless gratitude reached out their hands for its savior -- "Thank you," they whispered.

The End

even the smallest light can guide someone home
